Organizational Structure

A clear line of responsibility from management down to the field teams, with one named contact for every side of the service.

Spraying Equipment

The equipment is chosen for the site and its size: a hand sprayer inside a kitchen, an engine pump with a long hose for farms and open ground. Every unit is calibrated and cleaned after each site.

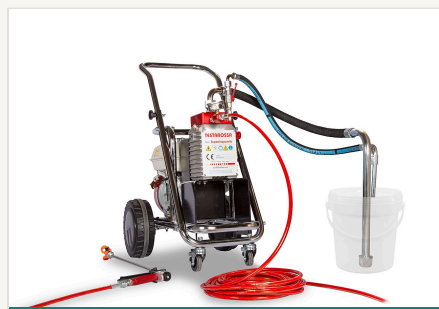

FOR FARMS & WIDE AREAS

Pickup-mounted farm sprayer

Large tank + engine pump

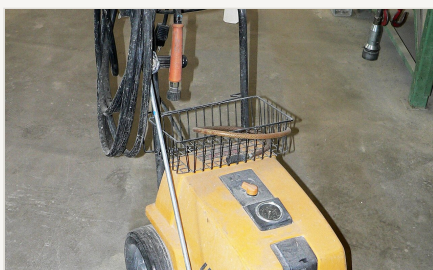

A large pesticide tank and engine pump fitted in the pickup bed, moving between farms and covering wide areas that hand-held sprayers can't reach.

Engine pump with long hose

Wheeled petrol unit

Farms, gardens and open ground.

High-pressure pump

Industrial use

Warehouses, industrial sites and surface washing.

Thermal fogger

Fogging unit

Enclosed voids, mosquito and fly control.

Engine sprayer

Petrol engine

Faster coverage and longer reach for perimeters and yards.

Backpack sprayer

16-20 L

Mid-size areas, corridors and small gardens.

Hand pressure sprayer

5-8 L

Kitchens, indoor areas and spot treatment.

Pest & Cleaning Equipment

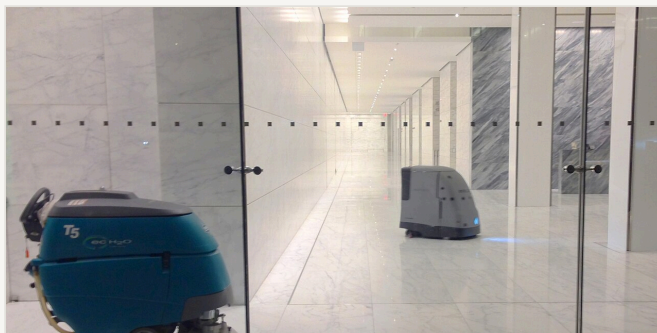

Alongside the spraying kit, we install fixed monitoring and control units inside facilities and run professional cleaning machines for floors and large areas.

Large-area floor scrubber

High capacity

Stations, warehouses and car parks.

Floor scrubber-dryer

Wash and dry

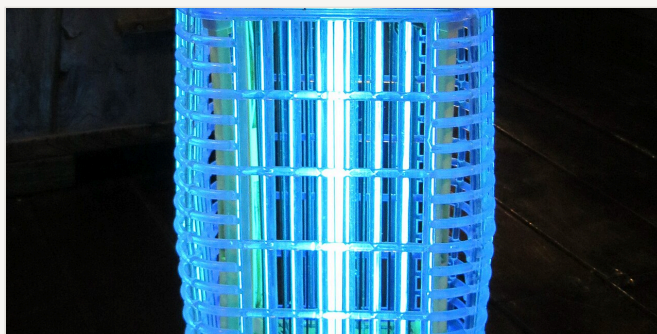

Malls, corridors and marble floors.

Steam cleaner

Hot steam

Carpets and surfaces without harsh chemicals.

Electric fly killer

UV light

Kitchens, warehouses and food-site entrances.

Mouse trap

Metal cage

Catches rodents alive without poison. Placed at activity points inside the building and checked every visit.

Steam mop

Floor sanitizing

Kitchens, restrooms and hard floors.

Materials & Safety

We use registered, approved pesticides, and apply protective equipment and safe storage and transport procedures on every site.

Pesticides & Formulations

LIQUIDS, POWDERS, GELS

- Emulsifiable concentrates (EC) for general spraying
- Wettable powders (WP) for porous surfaces
- Crawling-insect gel applied into cracks and voids
- Dusts for voids and for behind fixed equipment
- Insect growth regulators (IGR) to break the breeding cycle

Baits & Rodent Systems

SECURED & NUMBERED

- Wax block baits for damp and outdoor areas
- Paste and pellet baits for dry indoor areas
- Lockable bait stations, fixed in place and numbered
- Glue boards and cage traps for live capture
- Ant and fly baits matched to the species

Monitoring & Inspection

TRAPS & RECORDS

- Pheromone traps to monitor stored-product insects
- Light glue traps for flying insects
- Numbered monitoring cards to record activity
- Inspection torches and mirrors for voids and cracks
- Moisture meters to trace what draws pests in

Personal Safety

PPE

- Full coveralls and head cover
- Half-mask respirators with pesticide-rated filters
- Nitrile gloves and safety goggles
- Safety boots, plus hearing protection when the pump runs
- A first-aid kit in every vehicle

Support Supplies

VEHICLES & DOSING

- Water tanks and measuring gear for dosing
- Warning signs and tape to cordon off treated areas
- Tools for sealing entry points and gaps
- Bags and disposal arrangements for waste
- Vehicles fitted out to carry chemicals safely

Chemicals are dosed to measure and logged in the visit report, and equipment is calibrated and cleaned after every site. Chemicals are kept in a dedicated store, away from food materials.

NOTE

Experience built on commitment

Habibco United has worked in pest control and cleaning since 2008. Over those years we have served more than 5,000 clients: commercial facilities, hotels, restaurants, government sites and homes.

We treat every site as its own case. We inspect and find the source, build a treatment plan that fits the site and the activity in it, carry it out with a trained crew and dedicated equipment, and close with follow-up and documentation.

2008

Founded

5,000+

Clients served

3

Core service areas

HOW WE WORK

1

Inspect

A site walk to establish the source and the extent.

2

Plan

Methods and materials suited to the activity and its hours.

3

Execute

A trained crew, dedicated equipment, safety procedures.

4

Follow up

Scheduled visits and a report after each one.

WHERE WE WORK

Sectors we work in every week

Every sector has its own rhythm and hours, so the visit schedule is built around site activity rather than a fixed calendar.

Hospitality & hotels

Rooms, kitchens and public areas, on visits that stay out of guests' way.

Hotels · Serviced apartments · Halls and hospitality venues

Restaurants & kitchens

Careful handling of food-prep areas, with materials approved for use around food.

Restaurants · Food chains · Central kitchens

Retail & facilities

Malls, shops, government offices and workplaces, on recurring contracts.

Malls · Retail · Government facilities · Offices

Vision & Mission

- 1 Our vision** To be the first choice in the Kingdom for pest control and cleaning, through organized work and results the client can both feel and measure.
- 2 Our mission** To protect people's health and the reputation of their facilities through precise, safe service, delivered by a trained crew with the right equipment and a clear plan for each site, and followed up beyond the visit itself.
- 3 Our promise** An assessment visit before pricing, a written plan before we start, a report after every visit, and one contact who knows the details of your site.

OUR VALUES

Commitment

Set appointments and work delivered as agreed, with no postponement and no change of scope after the fact.

Safety

Materials and methods suited to occupied sites, measured doses and a stated re-entry time.

Transparency

Clarity on scope, reports and cost, and an assessment visit before pricing.

Continuity

Regular follow-up that holds the result long term, and one contact who knows your site.

Our Services

Three connected areas covered by one team under one plan, so the site stays clean and safe all year.

Assessment visit before pricing ■ A report after every visit ■ A follow-up schedule year round

1 Pest control

PEST CONTROL

We inspect the site and identify the source of the infestation, then treat crawling insects, flying insects and rodents directly, with recurring prevention programs that keep them from returning.

Crawling insects

Flying insects

Rodents

Termites

Prevention programs

2 Cleaning services

CLEANING SERVICES

Cleaning for commercial facilities, offices and public buildings: floors, façades, carpets and shared areas, on recurring contracts or scheduled visits.

Floors and marble

Carpets and upholstery

Façades and glass

Commercial kitchens

Recurring contracts

3 Disinfection & sanitization

DISINFECTION & SANITIZATION

Disinfection of kitchens, restrooms and shared areas with materials approved for occupied spaces, and a stated re-entry time before activity resumes.

Kitchens and restrooms

High-touch surfaces

Corridors and shared areas

Scheduled disinfection

SCOPE

What the service covers

A site assessment visit before pricing

A written treatment plan with a set duration

Work outside business hours where needed

Sealing entry points and treating moisture sources

Scheduled follow-up visits and a documented report

PEST CONTROL

Pest Control

We don't start with a spray. We start by reading the site: what happens in it, where food and moisture come from, and how pests get in. From there we choose the least intrusive treatment that works, and set a follow-up schedule that keeps the problem from coming back.

STEP 1

Inspection and diagnosis

A site walk to identify the pest, its source and how far it has spread.

STEP 2

Treatment plan

Choosing the method and material that suit the site and its working hours.

STEP 3

Execution

A trained crew with dedicated equipment and full safety procedures.

STEP 4

Follow-up and prevention

Recurring visits, and a report after each one covering what was done and what we advise.

Crawling insects

Flying insects

Rodents

Termites

Prevention programs

WHO WE SERVE

Sites we clean

Hotels and serviced apartments

Restaurants and commercial kitchens

Offices and head offices

Malls and retail shops

Government facilities and homes

CLEANING SERVICES

Cleaning Services

Cleaning that matches the place your clients walk into. We work inside commercial facilities, hotels, offices and public buildings, on a visit schedule that fits your hours instead of interrupting them.

- Floor and marble care
- Façades and glass
- Commercial kitchens
- Carpet and upholstery cleaning
- Offices and shared areas
- Recurring cleaning contracts

DISINFECTION & SANITIZATION

Disinfection & Sanitization

A service that completes the cleaning by targeting the surfaces and spaces people touch most. We use materials suited to occupied places, set the re-entry time before activity resumes, and document every visit.

- Kitchen and restroom disinfection
- High-touch surfaces
- Shared areas and corridors
- Scheduled recurring disinfection

AFTER EACH VISIT

After each visit you get

- 1 A report showing which areas were disinfected
- 2 The re-entry time before activity resumes
- 3 The next visit, already on the schedule

Why Habibco United

What sets the service apart isn't the equipment on its own, it's how the work is run from the first call to the follow-up report.

A trained crew

- 1 Technicians who know how each kind of site behaves and handle materials the right way.

Fast response

- 2 Visits scheduled at the earliest slot available, with urgent cover for emergencies.

A plan per site

- 3 There is no single template for everyone; the plan is built after the inspection.

The right equipment

- 4 Tools and materials chosen for the area and the activity, not for what happens to be on the truck.

Records and reports

- 5 A report after every visit covering what was carried out and what we recommend next.

Long relationships

- 6 More than 5,000 clients since 2008, and many of them renew every year.

Since 2008 we have worked to the same principle:
inspect first, then a written plan, then follow-up
that doesn't end when the visit does.

18+

Years in the Saudi market

3

Service areas: pest control,
cleaning, disinfection

5,000+

Clients, many of them renewing
yearly

Our Clients

We serve facilities across hospitality, restaurants, retail, the government sector and malls, and most engagements turn into renewing contracts.

 مجموعة بن لادن السعودية SAUDI BINLADIN GROUP		
 فندق بونسيانا Poinciana Hotel	 رد سي مول RED SEA MALL	
 شركة الراشد للتجارة والمقاولات AL-RASHID TRADING & CONTRACTING CO.		 الرومانسية alRomansiah

5,000+

Clients served since 2008

5

Core sectors: hospitality, restaurants, retail, government, malls

SAFETY CHECKLIST

Reviewed before every visit

Uniforms and PPE for the crew

Approved materials suited to the site

Dose and re-entry time set in advance

Safe storage and transport of materials

Equipment checked before it runs

Any item left open stops the visit until it is resolved.

QUALITY & SAFETY

Quality & Safety

Quality here isn't a claim made at the end of the job, it's a set of controls applied while the work is happening. We work in places where families, staff and guests are present, so safety comes before every step.

1 Materials suited to occupied sites

The material and its concentration are chosen for the site, with a stated re-entry time before activity resumes.

2 Dosing and usage controls

Clear instructions for the crew that rule out excess or unnecessary application.

3 Protective equipment for the crew

Uniforms and personal protective equipment on every visit, with equipment checked beforehand.

4 A record of every visit

A log of what was done and when, as a reference for the client and for the visits ahead.

We work in line with the regulations in force in the Kingdom for pest control and cleaning services.

Let's start with an inspection

Call or send a message and we'll answer a visit request within 24 hours. The assessment visit always comes before pricing.

WEBSITE

habibco.site

 Visit website

HOW IT STARTS

1

A call or a message

You tell us the type of site and the problem; we reply within 24 hours.

2

An assessment visit

A site walk where we pin down the source of the problem and the scope of work.

3

Plan and cost

A written proposal covering scope, timing and cost, then execution.
